Choice Gladiolus NEW INTRODUCTION FOR 1954

WAX CANARY (Woods)

Again we give you a Glad that will please you. Wax Canary has been grown by several nationally known gladiolus growers throughout the country and is strongly recommended for release. A basket of Wax Canary shown at the Central International in Chicago created a sensation. Nothing like it on the market today in its color range for beauty and growth. Field height over 60 inches with a 30 inch flower head. Floret is 5½ inches, 20 to 22 buds with 7 or more open in field. Very healthy. Color is light salmon in center blending to deeper salmon at outer edges with soft yellow lip. Petals are fluted and needlepoint with heavy texture. It has the appearance of being waxed. Wax Canary does not crook or burn. Excellent bulb production and germination. Wax Canary is another top-notch, and a commercial and exhibition variety. Blooms in about 80 days. I highly recommend this variety.
